

MONITOR OCCUPANCY LEVELS IN YOUR PLACE OF BUSINESS ACCURATELY AND AUTOMATICALLY

The SentiSYS Wireless Capacity Monitoring Solution is designed to help public facilities, local merchants and other commercial businesses comply with public health and safety occupancy requirements using automatic people counting sensors.

- ✓ Easy installation – set up and maintenance included
- ✓ Uses a private and secure wireless network
- ✓ Privacy-friendly - No video or still images of your visitors
- ✓ Low profile counters placed at entries/exits

- ✓ Visitor count, foot traffic, capacity levels, and occupancy data is cloud-based and available on any device
- ✓ Use data to comply with public health regulations and fire code occupancy limits, and for staff scheduling and promotion planning
- ✓ Bidirectional counter - counts entries and exits separately with intelligent diffuse reflection technology
- ✓ Cost-effective with flexible payment plans
